ELSEVIER

European Journal of Operational Research 96 (1996) 661–663

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 96

1 Survey of mathematical programming models in air pollution management (Invited Review)
W.W. Cooper, H. Hemphill, Z. Huang, S. Li, V. Lelas and D.W. Sullivan

36 Air cargo revenue management: Characteristics and complexities (Perspectives for Practice)
R.G. Kasilingam

45 Reducing depot-related costs of large bus operatorsa case study in Bangkok
P.P.G. Van der Perre and D.D.L. Van Oudheusden

54 Optimal lines for railway systems
M.R. Bussieck, P. Kreuzer and U.T. Zimmermann

64 On farmers'objectives: A multi-criteria approach
J.M. Sumpsi, F. Amador and C. Romero

72 Optimal location and capacity of emergency cleanup equipment for oil spill response
E. Iakovou, C.M. Ip, C. Douligeris and A. Korde

81 Multicriteria decision analysis and environmental economics: An approximation
C. Romero

90 Scheduling projects to maximize net present value – the case of time-dependent, contingent cash flows
R. Etgar, A. Shtub and L.J. LeBlanc

97 Vendor selection and evaluation An activity based costing approach
F. Roodhooft and J. Konings

103 Constrained games for evaluating organizational performance
J. Semple

113 An algorithm for single shift scheduling of hierarchical workforce
R. Narasimhan

122 Economic design of a complete inspection plan with interactive quality improvement
W.C. Ng and Y. Van Hui

130 Exact evaluation of (R, Q)-policies for two-level inventory systems with Poisson demand
R. Forsberg

139 A model of incentive contracts for just-in-time delivery
J.R. Grout

148 Price-based planning and scheduling of multiproduct orders in symbiotic manufacturing networks
S. D'Amours, B. Montreuil and F. Soumis

167 Nonlinear programming for multiperiod capacity planning in a manufacturing system
K.M. Bretthauer and M.J. Côté

180 Searching for important factors in simulation models with many factors: Sequential bifurcation
B. Bettonvil and J.P.C. Kleijnen

195 A Markov chain analysis of genetic algorithms with power of 2 cardinality alphabets
H. Aytug, S. Bhattacharrya and G.J. Koehler

202 Comment on a decision support approach for negotiation: Software vs. methodology
M. Verkama and P. Heiskanen

205 PSPLIB – A project scheduling problem library
R. Kolisch and A. Sprecher

217 Sequential location problems (Invited Review)
H.A. Eiselt and G. Laporte

232 A generalized group maintenance policy
S.-H. Sheu and J.-P. Jhang

248 Optimal inspection and replacement policies for multi-state deteriorating systems
R.H. Yeh
260 Nonparametric repair-limit replacement policies with imperfect repair
T. Dohi, N. Matsushima, N. Kaio and S. Osaki
274 Job sequencing rules for minimizing the expected makespan in flexible machines
A.K. Chakravarty and N. Balakrishnan
289 An approximate solution and error bound for a discrete time queue with simultaneous servicing
N.M. van Dijk
299 A simple approach for analyzing feedback vacation queues with levy input process
T.Y.S. Lee
317 New inequalities for the General Routing Problem
A.N. Letchford
323 The hierarchical network design problem with multiple primary paths
N.G.F. Sancho
329 An efficient tabu search procedure for the p-Median Problem
E. Rolland, D.A. Schilling and J.R. Current
343 Evaluating naval tactical missile systems by fuzzy AHP based on the grade value of membership function
C.-H. Cheng
351 The sensitivity of the analytic hierarchy process to alternative scale and cue presentations
S.A. Webber, B. Apostolou and J.M. Hassell
363 Group preference aggregation in the multiplicative AHPThe model of the group decision process and Pareto optimality
R.C. Van Den Honert and F.A. Lootsma
371 A probabilistic interpretation of the final rankings in AHP
E.S. Rosenbloom
379 An action learning evaluation procedure for multiple criteria decision making problems
N. Bryson and A. Mobolurin
387 An intrinsic consistency threshold for reciprocal matrices
H. Monsuur
392 A general framework for distance-based consensus in ordinal ranking models
W.D. Cook, M. Kress and L.M. Seiford
398 Establishing strict dominance between alternatives with special type of incomplete information
K.S. Park, S.H. Kim and W.C. Yoon
407 A method for selecting a subset of alternatives for future decision making
C. Meyer Ehrman, M. Hamburg and A.M. Krieger
417 Rank-based selection strategies for the random walk process
Y.H. Chun

429 Rate-Monotonic scheduling for hard-real-time systems (Invited Review)
A.A. Bertossi and A. Fusiello
444 Self-reinforcing mechanisms and market information
E. Agliardi and M.S. Bebbington
455 The effect of information on commuters' behavior: A comparative micro-simulation approach
Z. Sinuany-Stern, E. Stern, Z. Sfaradi and E. Holm
471 A unified approach to fuzzy pattern recognition
D. Dumitrescu and A. Dumitrescu
479 Monitoring machine operations using on-line sensors
L. Gong and K. Tang
493 A shrunken cyclic inspection schedule for deteriorating production stages
G. Rabinowitz
504 The combinatorics of timetabling
D. de Werra
514 A note on the equivalence of two heuristics to minimize total tardiness
B. Alidaee and S. Gopalan
518 Scheduling with batch setup times and earliness-tardiness penalties
Z.-L. Chen
538 Evaluation of leading heuristics for the single machine tardiness problem
R.M. Russell and J.E. Holsenback

546 Single machine earliness and tardiness scheduling
G. Li
559 A note on minimizing the weighted sum of tardy and early completion penalties in a single machine: A case of small common due date
B. Alidaee and I. Dragan
564 Scheduling with agreeable release times and due dates on a batch processing machine
C.-L. Li and C.-Y. Lee
570 Economic scheduling of products with N components on a single machine
B. Gim and M.-H. Han
578 A branch-and-bound algorithm with fuzzy inference for a permutation flowshop scheduling problem
J. Cheng, H. Kise and H. Matsumoto
591 Lot streaming with detached setups in three-machine flow shops
J. Chen and G. Steiner
612 On minimizing resource consumption with constraints on the makespan and the total completion time
S.H. Vasilev and B.L. Foote
622 Sequencing jobs for an automated manufacturing module with buffer
A. Bolat
636 Heuristic approaches for $n/m/F/\sum C_i$ scheduling problems
C. Wang, C. Chu and J.-M. Proth
645 Modelling for a dynamic inventory-production control system
J. Potamianos, A.J. Orman and A.K. Shahani
659 OR Software, *H. Thiriez*
